Cold to Warm Ash Removal

Cougar

Quieter Operation
Model MU405
79 decibels

Powerful 6 Amp motor features replaceable brushes and bearings for extended life.

These vacuums are specifically designed to remove cold to warm ash from wood stoves, pellet stoves, fireplaces and barbecues.

Features:

- Best selling ash vacuum since 1988
- Designed with safety in mind
- Fire resistant synthetic fabric filters
- Patented double-filter system
- Clean filters without opening the canister to keep ashes inside
- Doesn't "cough" out ashes when started

Designed for all types of ash:

- Fire place ash
- Wood stove ash
- Pellet stove ash
- Corn stove ash
- Wheat stove ash

MU405 includes:
1 Canister
1 5' metal hose
1 Steel nozzle
1 Inner Filter
1 Outer Filter

Optional 4P22:
1 Crevice tool
1 Horse hair brush
1 Pellet stove cleaning hose
1 1-1/4" adapter

Filter option 2F22:
1 Inner Filter
1 Outer Filter

dustlesstools.com

AshVacs are specially designed for fireplace applications. Engineered synthetic fabric filters are designed to capture extra fine ash particles that escape normal vacuum systems. The outer filter is made of a fire resistant synthetic fabric.

Metal construction of key components (canister, flexible hose and nozzle) provides superior heat resistance.

The patented filter system enables you to clean it without opening the lid so ash doesn't escape. Simply wiggle the agitator rod to knock ash off the outer and inner filter.

Quick, easy and clean!
