Dustless Tools for Construction

Rely on Dustless Technologies for innovative dust and slurry control solutions. Whether you are grinding, sawing or sanding, we have an array of tools, accessories and vacuums to make the job clean, easy, fast and safe.

Save time and money. Collect dust and slurry as it is made – at the point-of-origin. Make clean up fast and efficient. Reduce labor costs and complete jobs faster.

Work safer. Protect workers with systems that capture up to 99% of hazardous material dust before it goes airborne.

Work faster. Eliminate the time and money spent on cleaning up dust and slurry after a job is done. Finish fast and move on to the next job quickly.

Work confidently. Rely on dependable solutions that come with the industry's best 3-year warranty.

Work smarter. Innovative solutions from Dustless Technologies improve efficiency and safety.

Meet government guidelines. Avoid large fines and the risk of being shut down by using Dustless solutions that exceed the most stringent guidelines set forth by the EPA, NIOSH and OSHA.

WITHOUT Dust Control

WITH Dust Control

WunderBag™

- For HEPA & Wet Dry vacuums
- Extends HEPA filter life
- Holds up to 40 lbs of dust
- Retains its strength when wet

Dustless® Wet/Dry Vacuum

- Designed specifically to capture extra fine dust
- Switch from wet to dry vacuuming without changing filters
- Excellent for drywall, concrete, stone & fiberglass
- CFM 126.39

Dustie®

- Quick and easy to install
- Economical dust collection
- Fits 4" thru 9" grinders
- Captures 99% of dust

SawBuddie™

- Fits reciprocating saws
- Captures dust from Sawsall saws
- Easy to install shroud
- Open-top design for improved sight

DustBuddie®

- Removable front lip for grinding against walls
- Fast and easy to install
- Professional's #1 choice
- Fits most hand grinders

Slurry Vacuum

- 90" water lift at 300 CFM
- Lift slurry with a 100 foot long hose - at truck bed height
- Optional ToolSync synchronizes tools and vacuum on/off

BrickBuddie™

- Captures dust when dry sawing
- Fits Dewalt chop saws

CutBuddie®

- Fast and easy to install
- Depth gauge to control cutting depth
- Fits most hand grinders

BitBuddie™

- 3 sizes for a variety of applications
- Suction holds it in place – no clamps
- Captures dust and slurry

HEPA Wet/Dry Vacuum®

- Go from dry to wet vacuuming without stopping
- Longer HEPA filter life when used with WunderBag™
- Large 16 gallon capacity
- Full unit certified HEPA vacuum meets EPA RRP guidelines
- CFM 126.39

Dustless Tools for Painting/Renovation

How we became the leader in dust control solutions for painting/remodeling professionals:

When the EPA RRP regulations went into affect, manufacturers scrambled to come up with HEPA vacuums, but many missed the mark by retrofitting HEPA filters into their existing vacuums. Dustless Technologies had the foresight to design a vacuum around a certified filter to create an airtight solution that exceeded all government guidelines.

Dustless also used its experience in point-of-origin dust collection solutions to develop unique products specifically for painters and renovation contractors.

The **Turbo Drywall Sander** fills a unique niche for jobs where space is tight, such as kitchens and bathrooms. The orbital sanding head is powered by airflow from the vacuum so the unit is extremely lightweight. Its rectangular sanding head enables sanding in corners.

The **ChipBuddie™** is the only point-of-origin dust-free scraper. Contractors often use it for removing popcorn ceiling.

The **SawBuddie™** is the industry's only point-of-origin dust collection system for use with hand-held reciprocating saws.

The **DiscBuddie™** makes sanding lapsiding a clean and efficient process.

Contractors love **DustBubbles™** because they make drilling holes a neat, clean process.

A 4" **BitBuddie™** is a great accessory for capturing dust when cutting with a drywall saw.

The **HEPA Pack™** vacuum meets EPA RRP guidelines and gives contractors the portable convenience of a back pack vacuum that goes anywhere with ease.

BitBuddie™

- Captures drywall dust when sawing
- Use for vent and light switch holes
- Held in place by vacuum air
- No clamps necessary

Pole extends 6 feet for reaching up to 14 feet.

Pole can be removed for hand sanding.

Certified HEPA Wet/Dry Vacuum

- Meets EPA RRP guidelines
- WunderBag™ extends life of HEPA filters
- Go from dry to wet vacuuming without stopping
- Large 16 gallon capacity canister
- CFM 126.39

HEPA Pack™

- Meets EPA RRP guidelines
- Comfortable harness
- Clean filter without opening
- Sealed HEPA filter bag
- CFM 110

DiscBuddie™

- Fits Makita sanders
- Adjustable angle
- Clear shroud for improved visibility
- Polycarbonate (bullet-proof glass)

ChipBuddie™

- Dust-free scraper
- Airflow on both sides of blade
- Great for popcorn ceiling

SawBuddie™

- Fits reciprocating saws
- Easy to install shroud
- Captures 98% of dust
- Open-top design for improved sight

Turbo Drywall Sander

- Orbital head powered by airflow from vacuum
- Lightweight - no electric motor
- Rectangular head for sanding in corners
- Small head for tight places
- Great for kitchen and bathrooms
- 6 foot extendable pole for high places
- Removable pole for hand sanding

DustBubble™

- Stick it, drill it, toss it
- Captures drill shavings
- 3 specs (drywall, wood & metal)
- Disposable
- Great for renovation work

WARNING! If using Dustless shrouds, tools or accessories for the removal of lead paint, a Dustless® HEPA vacuum must be used. The removal of old paint may generate dust or fumes that contain lead. Exposure to lead may cause brain damage or other adverse health effects, especially in young children and pregnant women. Follow all federal, state and local laws including the U.S. Environmental Protection Agency's Renovation, Repair and Painting law or similar state law.

Dustless Tools for Flooring

We asked what you wanted and here is what you told us:

You asked for a vacuum that is **reliable**, and that is why we did NOT include solenoids, or other vibration-sensitive electronics, in the system.

You asked for a vacuum with **long cleaning intervals**, and that is why we came up with AirBender™ technology.

You asked for a **low maintenance** vacuum and that is why we kept the design simple and functional.

You asked for **longer HEPA filter life**, and that is why we incorporated passive air zones that provide 10 times more protection, of your HEPA filter, from dust, than other cyclone vacuums.

You asked for a **workhorse** vacuum that could keep up with high production sanders, and that is why we came up with 600 cfm units.

You asked for a **portable vacuum** that would be easy to transport from job to job and that is why our vacuums are modular, lightweight, and the drums come with their own wheels.

You asked for a vacuum specifically designed for **wood flooring** applications, and another for **construction** (concrete) and **industrial** applications, and that is why we have the DustPro (wood) and DustDroid (concrete) models.

You asked for a way to mount a **generator** to a vacuum, and that is why we have our DustBot™ models.

You asked for a powerful vacuum with the convenience of **120 V power** and that is why we developed the 600 cfm models with dual motors.

You ask for a vacuum that didn't need to be stopped for **filter cleaning** and that's why we developed Air-Blast™ system.

You asked for a manufacturer that would **listen**, and that is why we are here.

DustPro™ 300 (wood saw dust)

- 300 cfm, 120v
- 30 gallon capacity drum
- Gauge tells when to clean filter
- AirBender™ technology
- Low maintenance (no solenoids)

DustPro™ 600 (wood saw dust)

- 600 cfm, 120v or 240v
- 50 gallon capacity drum
- Mini Helic Gauge for filters
- AirBender™ technology
- Low maintenance (no solenoids)

DustHoodie™

- Fits 7" to 9" grinders
- Perfect for floor prep
- Point-of-origin dust control
- Works well with FlatBoy™ flush sanding disc holder

DustDroid™ 130 (fine dust)

- 130 cfm, 120v
- 16 gallon capacity drum
- Certified HEPA
- Wunderbag™ extends HEPA filter life
- For concrete, fiberglass, stone dust

DustDroid™ 300 (fine dust)

- 300 cfm, 120v
- 20 gallon capacity drum
- Gauge tells when to clean filter
- AirBender™ technology
- AirBlast™ filter cleaning
- Low maintenance (no solenoids)

DustDroid™ 600 (fine dust)

- 600 cfm, 120v or 240v
- 30 to 50 gallon capacity drums
- Gauge tells when to clean filter
- AirBender™ technology
- AirBlast™ filter cleaning
- Low maintenance (no solenoids)

DustBot™ 300 & 600 (fine dust)

- Rack for generator
- Same features as DustDroids

Dustless Tools for Industrial/Janitorial

How do you meet government air-quality safety regulations ?

Rely on the industry leader in dust control. Dustless Technologies offers an array of effective dust control solutions that enhance safety and help you meet the most stringent guidelines for the EPA, OSHA and NIOSH.

Our line of dust shrouds fit hand grinders and provide effective point-of-origin dust collection for grinding and cutting concrete, stone, tile, fiberglass, masonry and other building materials.

Whether you need a portable back pack vacuum for your janitorial staff, a certified HEPA vacuum for dealing with lead paint, or a powerful industrial HEPA vacuum for a large project, Dustless Technologies has you covered.

Bring added efficiency to your operation with the revolutionary ToolSync™ system. ToolSync™ is the wireless way to synchronize the on/off functions of power tools with a vacuum. If you have a large shop, you can sync up to 16 different tools (ToolPods) to a single vacuum (with one VacPod).

Rely on the experts in effective dust control - Dustless Technologies.

ToolSync™

- Wireless tool start system
- Syncs power tools with vacuums
- Easy to set up and use
- Patent pending

Certified HEPA Wet/Dry Vacuum

- Meets EPA RRP guidelines
- WunderBag™ extends life of HEPA filters
- Go from dry to wet vacuuming without stopping
- Large 16 gallon capacity canister
- CFM 126.39

Dust Shrouds

- DustBuddie® for grinding
- Dustie® for grinding
- CutBuddie® for cutting
- Each installs easily
- Each fits most grinders
- Fits from 4" thru 9" grinders

HEPA Pack™

- Meets EPA RRP guidelines
- Comfortable harness
- Clean filter without opening
- Sealed HEPA filter bag
- CFM 110

DustDroid™ 130 (fine dust)

- 130 cfm, 120v
- 16 gallon capacity drum
- Certified HEPA
- Wunderbag™ extends HEPA filter life
- For concrete, fiberglass, stone dust

DustDroid™ 300 (fine dust)

- 300 cfm, 120v
- 20 gallon capacity drum
- Gauge tells when to clean filter
- AirBender™ technology
- AirBlast™ filter cleaning
- Low maintenance (no solenoids)

DustDroid™ 600 (fine dust)

- 600 cfm, 120v or 240v
- 30 gallon capacity drum
- Gauge tells when to clean filter
- AirBender™ technology
- AirBlast™ filter cleaning
- Low maintenance (no solenoids)

DustBot™ 300 & 600 (fine dust)

- Rack for generator
- Same features as DustDroids

Dustless Tools for Auto/Marine

Effective dust control doesn't have to be difficult or expensive.

Protect your workers by capturing dust at its point-of-origin with a dust shroud from Dustless Technologies. Whether you use an electric hand grinder or a pneumatic RO sander, you can capture up to 99% of airborne particles with a dust shroud from Dustless Technologies.

We also offer an array of vacuums suitable for any size of shop - from a one-man show, up to a huge enterprise. Our certified HEPA vacuums meet the most stringent government guidelines.

Bring added efficiency to your shop with ToolSync™ tool start system. It synchronizes the on/off functions of your power tools with a vacuum. You can sync up to 16 power tools (ToolPods) up to one vacuum (VacPod). This wireless system eliminates the need for extra power cords, eliminating trip hazards. There are ToolPods for electric tools as well as one for pneumatic tools.

Step up the safety in your shop. Step up to Dustless Technologies.

Certified HEPA Wet/Dry Vacuum

- Meets government guidelines
- WunderBag™ extends life of HEPA filters
- Go from dry to wet without stopping
- Large 16 gallon capacity canister
- CFM 126.39

ToolSync™

- Wireless tool start system
- Syncs power tools with vacuums
- Easy to set up and use
- Patent pending
- For pneumatic tools

Dustie RO™ Shroud

- Fits RO sanders
- Easy to install
- Captures 99% of dust

Dustie® Shroud

- Fits 4" thru 9" grinders
- Easy to install
- Captures 99% of dust
- Economical

DustBuddie® Shroud

- Fits 4" thru 9" grinders
- Easy to install
- Captures 99% of dust
- Professional's #1 choice

Wunderbag™

- Micro Pre-filter
- Disposable and inexpensive
- Retains strength when wet
- Holds more than 40 lbs. of dust
- Captures particles down to .5 micron
- Extends life of HEPA & other filters

Dustless® Wet/Dry Vacuum

- Clean filters without opening canister
- WunderBag™ captures particles down to .5 micron
- Go from dry to wet without stopping
- Large 16 gallon capacity canister
- CFM 126.39

AshVacs for Fireplaces, Pellet Stoves & Grills

Cheetah and Cougar ash vacuums provide a SAFE, CLEAN way to remove ash from a fireplace, wood stove, pellet stove or grill. Every component is designed for safety. The 6-gallon ash capacity fireproof canister is made of rolled steel. The 5-foot hose and nozzle are made of metal. The primary filter is fire-resistant up to 1,000°F. Other components are fire-resistant thermoplastic. Cool to warm ash removal.

The patented filtration system has dual filters specially engineered to capture the finest ash particles to keep your house clean and smelling fresh. You can clean the filters without opening the canister. Simply jiggle the agitator rod on the lid to knock ash off the filters with canister closed. The Cougar features extra baffling for more quiet operation.

- Fire-resistant components
- Patented dual filter system designed to capture fine ash
- Fire-proof 6-gallon ash capacity canister made from steel
- Fire-retardant primary filter
- Clean filters without opening the lid
