Drilling

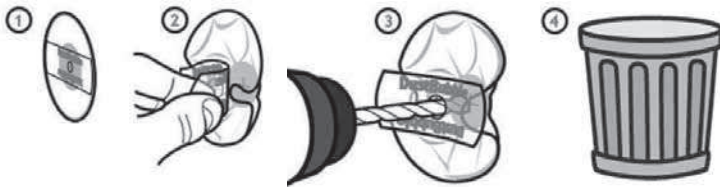

DustBubble™

Dustless Technologies®

Stick it • Drill it • Toss it

DustBubbles are disposable dust collectors for drills. To use them, simply peel away the adhesive backing, and stick the DustBubble to the surface. Then press the drill bit in the center of the DustBubble. Pull the tabs outward to inflate the DustBubble, then drill. Drill shavings and dust are collected inside the DustBubble. When done, simply peel away from the surface and throw it away.

- Sticks to the wall surface for hands-free drilling
- Clear, plastic for optimal visibility
- Flexible for drilling at a wide array of angles
- Heat resistant and durable for secure drilling

Choose from 3 specifications:

Regular Strength for wallpaper and painted walls

Extra Strength for wood, plaster and untreated surfaces
